

Intended use

Designed as a transporter for 6, 8 and 10mm thick baseplates.

About

The Admiral baseplate dolly is developed to have a highly ergonomic design. Placing heavy baseplates has been made easy with the intuitive design of our transporter. Moving 4 plates (10mm) or 6 plates (6 and 8mm) including conical couplers is no problem for this dolly.

The wheels on the dolly have been equipped with brakes. When they are applied, you can conveniently place your base plates onto the dolly effortlessly. The plates will slide easily into their designated place and when they reach an angle of 90 degrees, your plates are safely and stably stored.

Features

Ergonomically designed guide profile.

Indicator indicates which side the conical couplers should be.

Insert for flight case cover butterfly lock.

160mm castor for smooth rolling the heavy dolly.

Optional

Holder for flightcase, our baseplate holder is separately available, handy if you want to build a baseplate dolly yourself out of a flightcase.

Compose your own dolly that fits your type of baseplate.

components

Base plate dolly frame 730

This frame you use to build a baseplate dolly for 73cm baseplates.

length: 77cm
width: 59cm
